Physician Explainer

Oct 29, 2026 · Ken, ken@mybiohealth.ca (Founder)

Your patient has enrolled in *My*BioHealth, a Canadian membership that helps patients become more informed about their own health. The objective is to reduce the health noise patients experience, and with it their anxiety, so that conversations with you, their physician, are better informed.

The heart of the protocol: the information *My*BioHealth brings together over time.

	Labs BioSignals	14-Day CGM Cycle	DEXA
Measures	6	3 + Blood Pressure (at a kiosk) Resting Heart Rate Average Sleep Duration, e.g. 7–7½	2 Visceral Fat Lean Mass

*My*Consult – for your physician

A key part of the membership is identifying and tracking a few small habits expected to influence the patient's Primary Signals. We request that you incorporate the elements of the attached lab requisition into your normal flow.

About *My*BioHealth

- A patient-education membership. It is not a medical practice and does not diagnose, prescribe or treat.
- Every clinical decision remains with the physician.
- Members wear a CGM and complete a DEXA scan. The results are summarized for the patient to bring to you, and are available to you.
- Each member sets three priorities and three small habits that can influence them.
- More detail: mybiohealth.ca

In closing

Thank you for your support. I hope your experience as a physician is hugely positive, and I welcome your feedback.

Measure what matters. Have a plan.
